Luis Miguel Yglesias 1°DAW Compilar C en NetBeans

Hay que instalar si no se tiene ya instalado el compilador de C con sudo apt install gcc, y el depurador GNU junto con una serie de dependencias con el comando sudo apt-get build-essential.

```
luis@luis-virtual-machine:~$ sudo apt install gcc
[sudo] password for luis:
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
gcc is already the newest version (4:11.2.0-1ubuntu1).
gcc set to manually installed.
0 upgraded, 0 newly installed, 0 to remove and 43 not upgraded.
luis@luis-virtual-machine:~$ sudo apt-get install build-essential
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
build-essential is already the newest version (12.9ubuntu3).
0 upgraded, 0 newly installed, 0 to remove and 43 not upgraded.
luis@luis-virtual-machine:~$
```

Para compilar tenemos que instalar el plugin C/C++.

Hay que asegurarse de tener el centro de actualizaciones 8.2 Plugin Portal marcado.

Una vez instalado, en la carpeta source, en el archivo main.c, sustituimos el contenido de int main por prinf("").
